# Envella® Air Fluidized Therapy Bed (AFT)

## Elevating the Standard of Care

Patients with complex wounds need elevated care. That's why we developed Envella® bed—our most advanced wound care surface to date—to help your patients heal more quickly and comfortably.

Building upon Hillrom's strong legacy, Envella offers many key improvements over its predecessors—taking comfort, safety and ease of use to new levels.

### ELEVATE COMFORT

- Auto-leveling bead bath and reinforced side bolsters keep patients from bottoming out
- Adjustable firmness in the transition between the bead bath and the head section keeps patients in the best—and most comfortable—position
- AFT air flow can be adjusted quickly
- Adjustable comfort zones provide weight-based pressure redistribution in the head section
- Enhanced temperature control heats or cools the bead bath faster

### ELEVATE SAFETY

- Bed exit alarm (with alert silence) helps protect patients at risk of falls
- Side/Surface transfer deflates the head of bed and side bolsters to help you move patients more easily and safely
- Head-of-bed angle indicator and alert help you monitor pulmonary complications

### ELEVATE EASE OF USE

- Simple touchscreen controls
- Self-standing siderails and cord wrap hooks help you work efficiently
- Integrated scale lets you weigh patients any time without disrupting the wound site (especially helpful for dialysis, CHF, etc.—where frequent weighing is needed)
- High-quality casters and foot pedal braking make it easy to maneuver

**Hillrom™**

# Better Healing with Elevated Care

## FOR FLAPS AND GRAFTS

Protect against post-op surgical site complications to help patients with flaps and grafts heal faster.

## FOR STAGE 3-4 WOUNDS

Prevent and treat stage 3-4 wounds with a superior wound healing environment.

## FOR THE ENTIRE CARE CONTINUUM

Faster healing can lead to shorter lengths of stay, improved financials, and better patient outcomes in both acute and long-term care.
