Summary:	Provide clarification of instructions for cleaning, disinfecting, and additional instructions for "sterilization" for the above referenced Laryngoscope Handles.						
Issue:	Clarification of customer questions						

The following actions pertain to the Directions For Use listed in the table below:

DFU Document	Faxable Material No.	Printed Material No
DFU, LARYNGOSCOPE FO HANDLE	721462	722246
DFU, LARYNGOSCOPE STD HANDLE	721357	722244
DFU, LARYNGOSCOPE, RECHARGE HANDLE	721448	722247

THIS INFORMATION IS THE PROPERTY OF WELCH ALLYN, INC. AND AS SUCH SHALL NOT BE REPRODUCED, COPIED, OR USED AS A BASIS FOR THE MANUFACTURE OR SALE OF EQUIPMENT OR DEVICES WITHOUT THE EXPRESS WRITTEN PERMISSION OF WELCH ALLYN, INC.

Action: Please refer to Laryngoscope Handle Directions For Use for complete cleaning, disinfection, disassembly, assembly, and maintenance instructions.

Note: For all laryngoscope handles listed in Product(s) Referenced section on page 1.

In the "Cleaning and intermediate level disinfection instructions" section of the laryngoscope handle DFUs, there are three statements describing the appropriate type of cleaner/disinfectant. The intention is to instruct users on which cleaner/disinfectant chemical families they could choose from. Our analysis and testing showed the cleaner/disinfectants from the quaternary ammonium and alcohol families performed the best with the devices (both in compatibility and efficacy).

These three statements include the incorrect wording "...quaternary ammonium isopropanol....". The correct wording is ".....quaternary ammonium and/or isopropanol...."

Action: Please refer to Laryngoscope Handle Directions For Use for complete cleaning, disinfection, disassembly, assembly, and maintenance instructions.

Note: For all laryngoscope handles listed in Product(s) Referenced section on page 1 with the exception of 60710, 60720, 60713, and 60835.

Hydrogen peroxide "sterilization" methods for the laryngoscope handles are not included in the released DFUs. Since the release of the DFUs, marketing has received requests for laryngoscope handle hydrogen peroxide "sterilization" methods. These validated methods are provided below.

> Steris[®] Amsco[®] V-PRO[®] low temperature "sterilization": Follow equipment manufacturer and facility procedures in the set-up and operation of Steris[®] Amsco[®] V-PRO® low temperature sterilization equipment. Unwrapped V-PRO® sterilization settings are as follows:

- V-PRO 1: Lumen cycle
- V-PRO 1 PLUS: Lumen cycle, non-Lumen cycle
- V-PRO maX: Lumen cycle, non-Lumen cycle, Flexible cycle

STERRAD® hydrogen peroxide gas plasma "sterilization": Follow equipment manufacturer and facility procedures in the set-up and operation of the STERRAD® hydrogen peroxide gas plasma sterilization equipment. Unwrapped $\mathsf{STERRAD}^{\circledR}$ hydrogen peroxide gas plasma sterilization systems and cycles are as follows:

- STERRAD 100S: Standard (short) cycle
- STERRAD 100S: Long cycle (outside of US only)
- STERRAD NX: Standard, Advanced cycles
- STERRAD 100NX: Express, Standard cycles

Notes:

- 1. Contact Welch Allyn regarding any questions or concerns from this or other issues.
- 2. Drawings, illustrations, and part numbers in this document are for reference purposes only and subject to change.
