Introducing the Welch Allyn AM282 Manual Audiometer & TM286 Auto Tymp

Welch Allyn is pleased to announce the introduction of the AM282 Manual Audiometer and TM286 Auto Tymp Hearing Screening Products. The AM282, which replaces the current AM232, continues to provide multiple frequencies (125 Hz to 8000 Hz) and wide intensity range in a compact, light-weight screening audiometer. The TM286 Auto Tymp, which replaces the TM262, provides a flexible, screening product for tympanometry, acoustic reflex measurements and audiometry in a portable design.

Product Replacements: AM28200 is a direct replacement for AM23200 & AM23210. TM28600 is a direct replacement for TM26200, TM26200-RS, TM26230 & TM26230-RS.
