

Simple and Accurate Home Blood Pressure Measurement From a Brand You Trust

Clinical Accuracy in the Home

Welch Allyn, a trusted brand in patient monitoring, has brought clinical technology to the home. With our advanced SureBP® technology, Welch Allyn Home Blood Pressure Monitor compensates for factors that may affect the accuracy of measurement, such as motion, providing a device that is more accurate and comfortable for use in the home.

9 OUT OF **10** PHYSICIAN OFFICES USE WELCH ALLYN PRODUCTS IN THEIR DAILY PRACTICE

of physicians would recommend a Welch Allyn blood pressure device over comparably priced options³

Accuracy You Can Count On

82% of physicians agree that most patients do not follow all of the correct steps to get an accurate blood pressure when monitoring at home.¹ With SureBP technology, Welch Allyn Home Blood Pressure Monitor can help compensate for less than perfect conditions.

The Welch Allyn Home Blood Pressure Monitor has a **97% success rate** in presence of motion²

of the time, **competitive** devices fail in the presence of motion²

The Importance of Remote Monitoring

Self-measured blood pressure monitoring plus additional clinical support is one strategy that can reduce the risk of high blood pressure.⁴

American adults have high blood pressure³

of people with high blood pressure do not have their condition under control⁶

Cuff Size Matters

The Welch Allyn Home Blood Pressure Monitor has the largest cuff range available with 3 cuff sizes (ranging in coverage from 15 cm to 54 cm.)

The most common error in blood pressure measurement is under cuffing large arms⁵

Designed for Patient Comfort

20 seconds to accurate reading fastest on the market²

Welch Allyn Home Blood Pressure Monitor captures blood pressure in about **1/2 the time** as the leading competitor
